## **CSC TO CONSTRUCT FOUNDATION FOR NEW CHANGI AIRPORT TERMINAL 4**

- ✓ **More than \$200 million worth of contracts over the past six months**
  - ✓ **Eyes continued growth in Malaysia**
- 

**SINGAPORE, 13 September 2013** – Mainboard-listed foundation and geotechnical engineering specialist **CSC Holdings Limited** and its subsidiaries (collectively referred to as the “Group” or “CSC”) has been awarded the foundation contract for Changi Airport’s upcoming Terminal 4.

The contract will see CSC providing its expertise to construct the foundations for the airport terminal building terminal, ancillary buildings and infrastructure. The new Terminal 4 will be able to accommodate up to 16 million passengers annually and is expected to welcome its first passengers in 2017.

CSC was also awarded the foundation contract for the redevelopment of Robinson Towers and the adjacent International Factors Building along Robinson Road. The contract, valued at approximately \$20 million, calls for the construction of diaphragm walls and bored piles for the foundation of this new development. When completed, it will comprise an office tower with a retail podium and would be three times the height of the existing tower.

These latest contracts awarded form part of the \$200 million worth of foundation contracts secured in Singapore and the region since the start of its current financial year on 1 April 2013.

Other contracts amounting to more than \$100 million that CSC has secured in Singapore include HDB projects at Toa Payoh, Bedok, Punggol, Sengkang and Yishun, private residential developments Echelon Condominium, Midtown Residence and Waterwoods Executive Condominium, commercial developments Oxley Tower and Seagate Singapore Design Centre (the Shugart), and industrial facilities such as Shell’s project at the newly set-up Lube Park and other projects on Jurong Island.

## **FOR IMMEDIATE RELEASE**

---

The Group is also gaining ground overseas, particularly in Malaysia where it has carved a competitive edge for itself.

Since 1 April 2013, the Group has won contracts totalling more than RM130 million, or approximately 25% of the Group's total contract wins. These include foundation works for a number of private residential and mixed commercial-and-residential developments, as well as the Klang Valley Mass Rapid Transit project that is currently under development.

The Group is also steadily growing its presence in Thailand, with its Thai unit securing foundation contracts for several private residential and commercial projects located in and around Bangkok city. CSC's expertise in installing piles using the jack-in pile method positions it well to secure more contracts in the densely populated city, as this environmentally-friendly piling method is free of vibration, noise and pollution. The Group will also commence work on its first bored pile project in Thailand this month, for the construction of the new Parliament House in Bangkok.

As at 12 September 2013, CSC's order book stands at approximately \$ 230 million. The Group expects to complete the bulk of its projects over the next six months.

### ***About CSC Holdings Limited***

*CSC Holdings Limited (SGX: C06) is Singapore's largest foundation and geotechnical engineering specialist, and one of the region's leading ground engineering solutions providers for private and public sector work, which include residential, commercial, industrial and infrastructure projects.*

*The Group operates principally as a foundation and geotechnical specialist and offers a full range of capabilities in this field, including the construction and installation of large diameter bored piles, diaphragm walls, driven piles, jack-in piles, micro piles, soil improvement works, soil investigation, pile testing and instrumentation services, as well as automatic tunnel and structural monitoring survey. More information on CSC Holdings can be found at [www.cschl.com.sg](http://www.cschl.com.sg)*
